

BOCHK All Weather Asian High Yield Bond Fund

March 2025 (As of 28 February 2025)

Important Information

- BOCHK All Weather Asian High Yield Bond Fund (the "Sub-Fund") is a Sub-Fund of BOCHK Wealth Creation Series.
- The Sub-Fund is to generate long-term capital growth and income by investing primarily in high yield fixed income securities issued by governments, government agencies, supra-nationals, banks or companies which are domiciled in or derive revenue from or have business or economic activities in Asia or are denominated in any Asian currencies, as well as deposits with the aforementioned banks or financial institutions.
- Investment involves risks. The Sub-Fund involves significant risks including but not limited to market risk, risks associated with debt securities rated below investment/recognized grade or unrated, general risks relating to debt securities (including but not limited to credit risk, interest rate risk, volatility and liquidity risk, downgrading risk, sovereign debt risk, valuation risk, risk related to credit ratings, credit rating agency risk, and "Dim Sum" bond market risks), concentration risk, emerging markets risk, currency risk, risks of investing in convertible bonds, risks associated with investments in debt instruments with loss-absorption features (LAP), risks associated with distribution out of capital, risks relating to hedging and the hedged classes, RMB currency risk/risks relating to RMB denominated securities, etc. Past performance is not indicative of future performance. The value of the Sub-Fund can be volatile. Investors may not get back the full amount of capital invested or may suffer significant loss.
- The Manager may at its discretion pay distribution out of, or effectively out of, capital of the Sub-Fund. Investors should note that the payment of distributions out of, or effective out of, capital represents a return or withdrawal of part of the amount the investors originally invested or from any capital gains attributable to that original investment. Any distributions involving payment of dividends out of, or effectively out of, capital of the Sub-Fund may result in an immediate reduction of the net asset value of the relevant classes of units.
- Investors should not solely rely on this document to make any investment decision. Please refer to the Explanatory Memorandum and the relevant appendix in detail (including the full text of risk factors stated therein) about the Sub-Fund. If you have any questions about the information of this document, please seek independent professional advice.

Investment Objective

The investment objective of the Sub-Fund is to generate long-term capital growth and income by investing primarily in high yield fixed income securities issued by governments, government agencies, supra-nationals, banks or companies which are domiciled in or derive revenue from or have business or economic activities in Asia or are denominated in any Asian currencies, as well as deposits with the aforementioned banks or financial institutions.

Allocation

** The above refers to the credit ratings of the underlying fixed income securities of the Sub-Fund. The Sub-Fund will adopt credit ratings from Standard & Poor's or Moody's or an equivalent rating from an internationally recognised rating agency. If the relevant security does not itself have a credit rating, then reference can be made to the credit rating of the issuer of the security. If both the security and the relevant issuer are not rated, then the security will be classified as unrated.

Portfolio Characteristics

Average Yield to Worst : 8.4% p.a.*

Average Duration : 2.7 Years

* This figure is for reference only and is estimated based on the best judgement for the securities in the investment portfolio on the date shown by BOCHK Asset Management Limited. It does not represent future performance as well as actual performance. It excludes currency hedging income or cost and could fluctuate widely from period to period. The Sub Fund uses weighted average yield to worst (YTW) to show the Portfolio characteristic. YTW is the lowest potential yield that can be received on the bond portfolio without the issuer actually defaulting. YTW is calculated by making worst case scenario assumptions on the issue by calculating the returns that would be received if provisions, like issuer call.

Performance Chart (in USD & HKD)[§]

***Payment of dividend is not guaranteed.** The Manager has the discretion as to whether or not to make any distribution of dividends, the frequency of distribution and the amount of distributions, subject to the SFC's prior approval and not less than one month's prior notice to affected Unitholders. The Manager may at its discretion pay distribution out of, or effectively out of, capital of the Sub-Fund. Investors should note that the payment of distributions out of, or effective out of capital represents a return or withdrawal of part of the amount the investors originally invested or from any capital gains attributable to that original investment. Any distributions involving payment of dividends out of, or effectively out of capital of the Sub-Fund may result in an immediate reduction of the net asset value of the relevant classes of Units. The information indicated above is for your reference only. Please refer to the "Distributions" section stated in the appendix of the Sub-Fund. The calculation method of annualised yield: $[(1 + \text{Distribution per Share/Price on Ex-date})^{\text{distribution frequency in a year}} - 1]$. A positive distribution yield does not imply a positive return. Investment involves risks. Past performance figures are not indicative of future performance.
